Capacity Building for Organizations

Boasting a remarkable
10-year track record, we've
successfully handled nearly 3000
diverse datasets in collaboration
with numerous hospitals and
health organizations across the
Philippines.

101 Health Research is a
proud **PhilGEPS Platinum**
service provider

We TEACH RESEARCH

- Research Protocols
- Study Designs
- Medical Writing
- Literature Search
- Data Analysis
- Health Policy and Systems Research
- Responsible Conduct of Research
- Human Centered AI
- And many more!

Our health professions educators can design and implement a program for your organization in capacity building.

We've consistently organized workshops in close partnership with the Department of Health (DOH) and Community Health Departments (CHDs), engaging with 12 prestigious Tertiary Hospitals, esteemed medical schools and universities, as well as prominent medical societies.

We BUILD RESEARCH

Our IT and Data Scientists can help you build or maintain your research or patient databases.

Ask us about our previous and current projects and innovations for research and patient databases!

- Research databases
- Disease and procedure registries
- Backend support for health information systems

We APPLY RESEARCH

Clinical Practice Guidelines • Technical assistance for corporate enterprises
PSPHP-Health Security and outbreak investigations for factories

hello@101healthresearch.com

We are a
***Passionately
Curious*** team of
full-time
researchers.

We Do Research

We provide comprehensive technical support throughout major stages of the research life cycle.

We Teach Research

You can invite our team or roster of consultants for workshops about basic or advanced topics in clinical and public health research.

We Build Research

We help build research ecosystems through supporting data infrastructure, data management, and data analysis for medical registries and health information systems.

We Apply Research

We welcome collaborations to support data and research needs of public and private organizations.
